

PATENTED

LexisNexis® TotalPatent™

Search the largest online collection of enhanced first-level patent data

When it comes to innovation and protection of intellectual property, you need a resource that provides you with the most comprehensive, precise, and dynamic patent research and retrieval system available anywhere.

LexisNexis® TotalPatent™ offers the most patent content available from a single source and the tools you need to search and analyze it. With 100 patent authorities—30 in full text—you can be confident you're covering all the bases.

TotalPatent gives you the comprehensive patent data you need to help you address challenges such as:

- Protecting your patent portfolio
- Researching licensing opportunities
- Checking assignee and patent status
- Tracking competitor developments
- Watching innovation space
- Monitoring emerging markets

Whatever your challenge, TotalPatent can help you get to the relevant information you need.

Multiple search options

- Guided search
- Advanced search
- Semantic search
- Notes search
- Publication Number search
- Look up Assignee or Inventor
- National and international classification searching
- Search in English or original language of publication

Analytics and reporting tools

- Patent family reports
- Graphs and charts
- Compare up to three different search results sets
- Citation maps

Links and integration

- Chisum on Patents
- CourtLink®
- Elsevier Scopus® Preview
- PatentOptimizer™
- REEDFAX®

Download and export options

- Unlimited downloads
- Export to BizInt Smart Charts
- Export to Microsoft® Excel® spreadsheets
- Export to Word
- Export to Adobe® Acrobat®
- Export in condensable mark-up language (XML ST.36) and a variety of other formats

"By doing my research on TotalPatent, I feel like I'm not missing anything and that feeling of confidence is priceless."

—Katherine H. McGuire, Chair of the IP practice at Woods Oviatt

Search options

Multiple search options for the novice to the expert researcher.

Specify the segments to search.

Enter search terms or cut and paste up to 32,000 characters.

Additional options help you fine-tune your search.

One hundred patent authorities—with 30 in full text.

The Publication Number searching tool enables users to easily import up to 500 numbers in a flexible format, display them as a results set, and quickly retrieve the documents as compressed and searchable PDF copies.

The screenshot shows the TotalPatent search interface. The main search area is titled "Guided Search" and includes a "Search Input" field with a character limit of 32,000. Below this are "Search Options" for refining the search, including "Publication Date" (Previous 10 years), "Restrictions" (e.g., LexisNexis OR Reed Elsevier), and "Authorities" (Major Full Text, Other Full Text, Bibliographic and Abstract). The "Results Fields" section at the bottom allows users to select which data points to display in the results, such as Abstract, Assignees (Normalized), Notes, Application/Filing Date, Classes (IPC, ECLA, USC), Patent Family, Application Number, Clipped Image, Priority Data, Assignees, and Inventors. On the right side, there is a "Publication Number Search" section with a field to "Enter 1-500 Publication Numbers" and a "Search" button. Below this is a "Look Up Assignee or Inventor" section with a search field and a "Find" button. Further down is a "Find Subsidiary Companies" section with a search field and a "Find" button. At the bottom right, there is a "How Do I...?" section with links to "Find coverage information", "Find the most recent document", "Develop a terms & connectors search", and "Format application, priority, and publication numbers in my search request".

Look up the assignee names in millions of records, including Chinese, Japanese and Russian.

Ensure your patent research is as comprehensive as possible by including subsidiaries in your search.

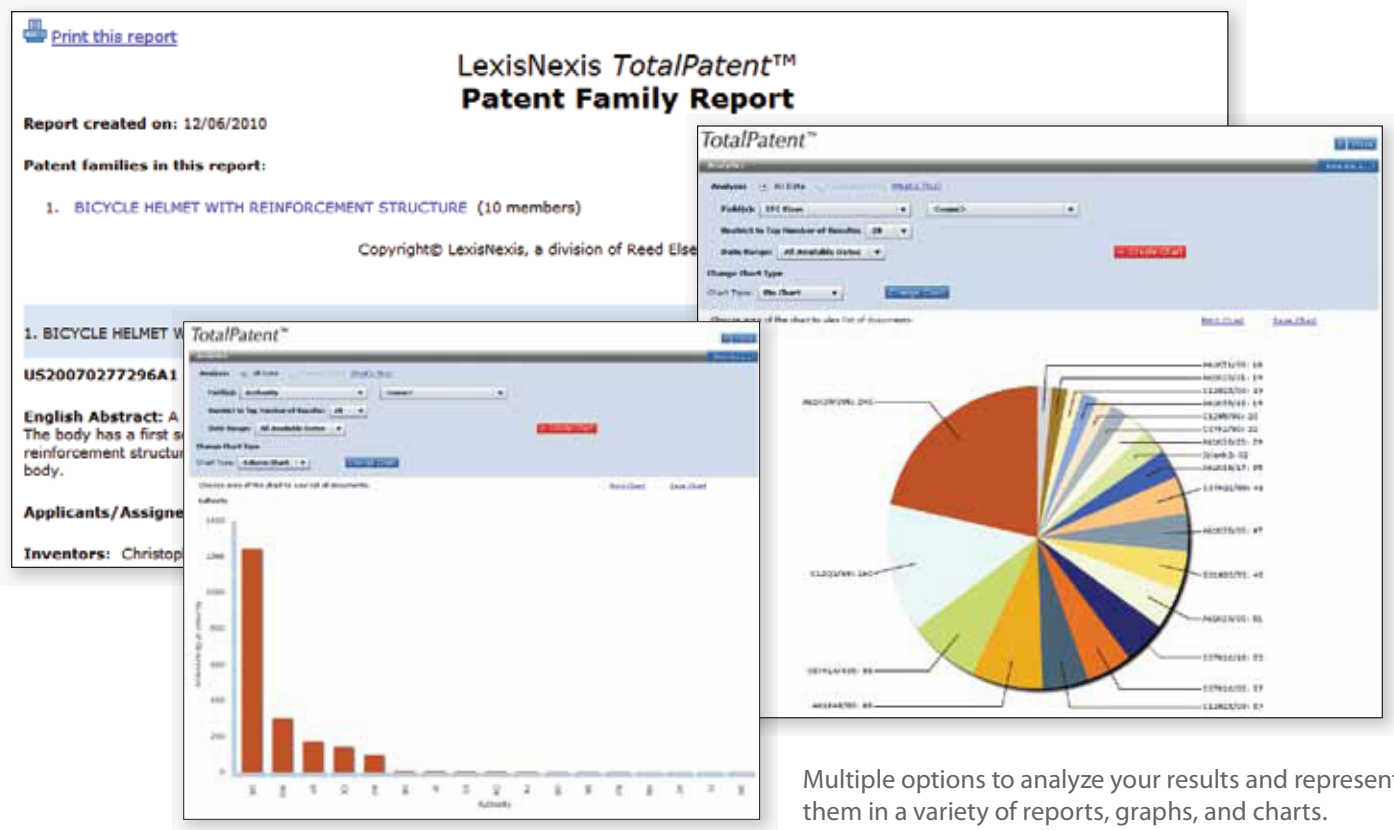

Search by national and international classification.

Context-sensitive help is available throughout TotalPatent.

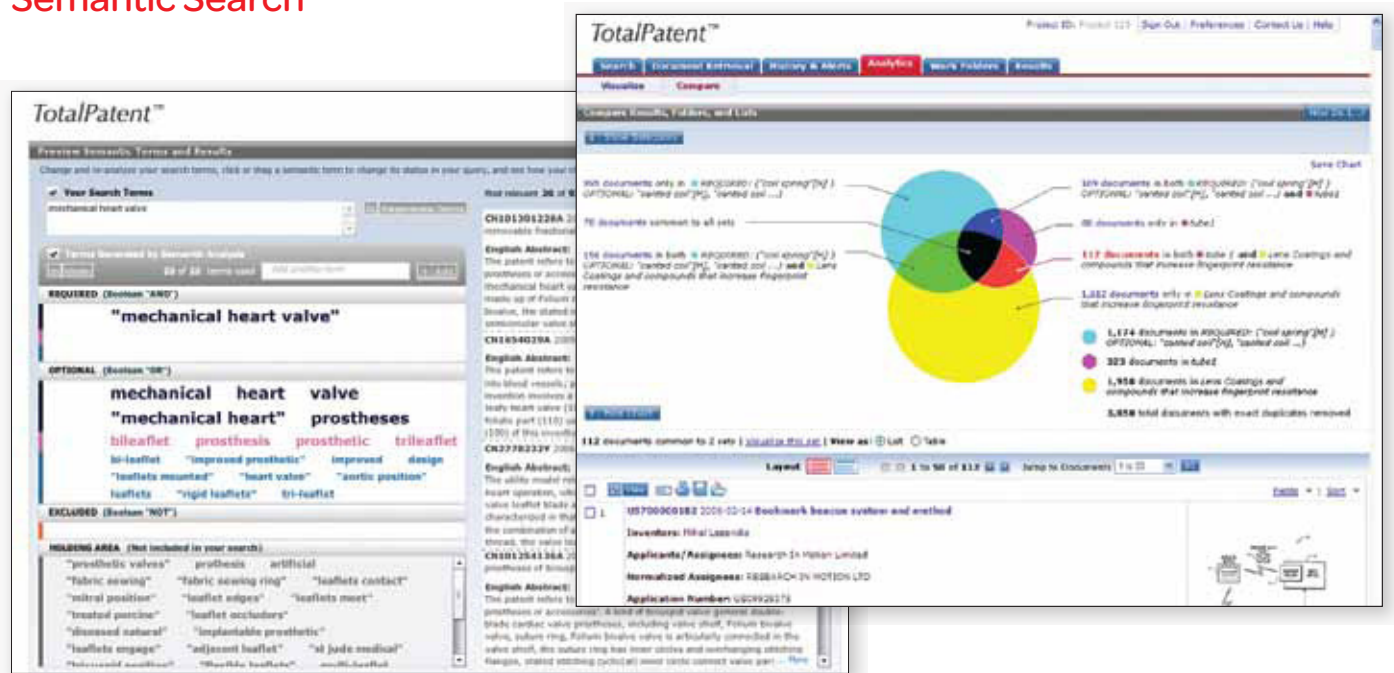

"We were attracted to TotalPatent because we saw that its functionality and comprehensiveness could serve as one-stop shopping for all of our patent research needs."

—Linda Boss, Manager of Library Services, Lang Michener

Analytics Tools

Semantic Search

Semantic search results can uncover more of the patents relevant to your query. With the compare and analyze feature, you can quickly see overlapping or unique documents in up to three results sets, including Boolean and semantic search results.

TotalPatent Features At-A-Glance

Feature	Description	How it helps you
100 patent authorities 30 in full text	More content than any other single provider.	A single search across multiple authorities saves you time. And because the claim(s) are uniquely available in the full text of the document, you'll be accessing the most important part of the patent(s).
Over 55 million PDFs	PDFs are also compressed, bookmarked, and multi-page.	Speed of downloading PDFs is greatly enhanced. Storage costs are reduced. Search and highlight terms within the PDF then copy and paste text from the PDF to other applications.
Search in original language or English.	You can choose to search in the language in which the patent was originally published as well as in machine-translated English.	Because a document is not published in English does not diminish its importance, neither is it any defense. The ability to search in English decreases the risk of missing important prior art or infringing other parties' intellectual property.
Semantic Search powered by PureDiscovery	The only truly transparent, user-controlled semantic search technology specifically "trained" to recognize patent concepts.	The user is in complete control of the semantic analysis, interacting with the technology to refine the concepts.
Alerts	The Alert you receive contains more of the information you need: <ul style="list-style-type: none"> • Bookmarks for navigating in PDFs • Description for annotations • Entire search displayed • Frequency • Next run date • Table of authorities with most recent updates • Table of contents created with links to the record 	You can forward your TotalPatent alerts to other TotalPatent users.
Side-by-side results views	Choose from: <ul style="list-style-type: none"> • Full • Claims • Image • PDF • Family • Legal • CourtLink • Notes 	Choose any 2 formats in a side-by-side view for ease of reviewing a patent document at issue.
Links to related information and tools	<ul style="list-style-type: none"> • Chisum on Patents • Elsevier Scopus Previews • CourtLink • PatentOptimizer 	Access additional details about a patent directly from the patent to see when and where it has been cited and if it has been or is in litigation, or dig deeper into the patent itself to see vulnerabilities or gaps.
Downloads	<ul style="list-style-type: none"> • Download up to 5,000 documents in XML-ST.36 standard format • Choose up to 500 original PDF documents for delivery and download • Option to download original PDF front page only 	You get the flexibility to incorporate your research results where and how you need them.
Visualize and compare up to three search results sets	A Venn diagram gives you a quick look at the differences between your research results. A simple click gives you specific document information.	Compare different research results sets to determine unique and overlapping documents.
Work folders	<ul style="list-style-type: none"> • Utilize up to 100 Work folders and 20,000 records per folder • Option to auto save searches to a selected Saved Search History folder • Easily export results from TotalPatent work folders directly to BizInt Smart Charts for Patents 	The work folders are yours to customize to your preferences as you use them to work with your research results.

These are only some of the highlights of TotalPatent features and functionality. Many of these features, and others coming in the near future, are based on customer input. Patent professionals from around the world tell us what would help them get the most from TotalPatent, and we develop and deliver it.
